1 INTRODUCTION TO OPHTHALMIC MEDICAL ASSISTING 1
What Is Ophthalmology? 1
Meet the Eye Care Team 2
  Ophthalmologist 2
  Optometrist 3
  Optician 3
  Registered Nurse 3
  Orthoptist 3
  Ocularist 3
  Ophthalmic Photographer 4
  Ophthalmic Medical Assistant 4
What Is Certification? 4
  Professional Development 5

2 ANATOMY AND PHYSIOLOGY OF THE EYE 7
The Eye as an Optical System 8
  The Globe 8
  The Adnexa 8
    Orbit 8
    Extraocular Muscles 9
    Eyelids and Conjunctiva 10
    Lacrimal Apparatus 12
  The Eye 12
    Cornea and Sclera 13
    Anterior Chamber 14
  Uvea: Iris, Ciliary Body, Choroid 14
  Crystalline Lens 15
  Vitreous 16
  Retina 16
  Visual Pathway 17

3 DISEASES AND DISORDERS OF THE EYE 19
Mechanisms of Disease and Injury 19
  General Types 20
    Signs, Symptoms, and Syndromes 21
Abnormalities of the Adnexa 22
  Orbit 22
  Extraocular Muscles 22
  Eyelids 23
  Lacrimal Apparatus 24
Abnormalities of the Eye 25
  Conjunctiva 25
  Cornea and Sclera 26
  Anterior Chamber 27
  Uveal Tract 29
  Crystalline Lens 29
  Vitreous 30
  Retina 30
  Optic Nerve 33
  Visual Pathway 33

4 SYSTEMIC DISEASES AND OCULAR MANIFESTATIONS 35
Inflammatory and Autoimmune Diseases 36
  Myasthenia Gravis 36
  Rheumatoid Arthritis 36
  Sarcoidosis 36
  Sjögren Syndrome 37
  Systemic Lupus Erythematosus 37

7 MICROORGANISMS AND INFECTION CONTROL  
Types of Microorganisms 86
- Bacteria 86
- Viruses 87
- Fungi 89
- Protozoa 90
- Prions 90
Transmission of Infectious Diseases 90
- Airborne Droplets and Particles 91
- Direct-Contact Transmission 91
- Indirect-Contact Transmission 91
- Common-Vehicle Transmission 92
- Vector-Borne Transmission 92
Infection Control Precautions 92
- Handwashing 94
- Use of Personal Protective Equipment 94
- Cleaning, Disinfection, and Sterilization 95
- Aseptic Technique: Handling Sterile Medical Equipment 96
- Handling and Decontaminating Contaminated Materials 97
- Hygienic Practices in Potentially Infectious Situations 97
- Collecting Specimens for the Identification of Microorganisms 97

8 COMPREHENSIVE MEDICAL EYE EXAMINATION  
Overview of the Examination 100
- Aspects of Eye Function, Anatomy, and Physical Appearance and Condition 100
Frequency of Examination 101
Ophthalmic and Medical History 101
- Chief Concern and History of Present Illness 102
- Past Ocular History 103
- General Medical and Social History 103
- Family Ocular and Medical History 104
- Allergies, Medications, and Supplements 104
- History-Taking Guidelines 104
- Visual Acuity Examination 105
- Distance Acuity Test 105
- Pinhole Acuity Test 106
- Near Acuity Test 106
- Other Acuity Tests 109
- Procedures Following Acuity Tests 109
- Alignment and Motility Examination 109
- Ancillary Tests to Be Performed Before Motility Testing 110
- Pupillary Examination 110
- Visual Field Examination 111
- Intraocular Pressure Measurement 112
- Principles of Tonometry 113
- Applanation Tonometry 114
- Indentation Tonometry 115
- Applanation Versus Indentation Tonometry 117
- Pachymetry 117
- External Examination 118
- Anterior Chamber Evaluation 118
- Biomicroscopy 119
- Gonioscopy 120
- Ophthalmoscopy 120
- Direct Ophthalmoscopy 120
- Indirect Ophthalmoscopy 121
- Additional Tests 121
- Color Vision Tests 121
- Tear Output Test 122
- Evaluation of the Corneal and Conjunctival Epithelium 123
- Corneal Sensitivity Test 123
- Exophthalmometry 123

9 OCULAR MOTILITY  
Anatomy and Physiology 125
Nerve Control 127
Eye Movements 127
Motility Examination 129
Strabismus Tests 129
- Corneal Light Reflex Tests 129
- Cover Tests 129
- Additional Tests 130
Summary 132
10 ADJUNCTIVE TESTS AND PROCEDURES 135
Vision Tests for Patients With Opacities 135
Visual Potential Tests 136
Contrast-Sensitivity and Glare Tests 137
Assessment of Corneal Abnormalities 138
Pachymetry 138
Corneal Topography 139
Specular Microscopy/Photography 139
Ophthalmic Photography 139
Tomography 140
Ultrasonography 142

11 PRINCIPLES AND TECHNIQUES OF PERIMETRY 145
Anatomical Basis of the Visual Field 146
Map of the Visual Field 147
Orientation of the Visual Field Map 149
Purposes and Types of Perimetry 149
Kinetic Perimetry 151
Static Perimetry 153
Miscellaneous Visual Field Tests 155
Defects Shown by Perimetry 156
Generalized Defects 156
Focal Defects 156
Hemianopic and Quadrantanopic Defects 158
Other Defects 158
Conditions for Accurate Perimetry 160
Environment-Related Factors 160
Device-Related Factors 162
Patient-Related Factors 162
Examiner-Related Factors 163

12 FUNDAMENTALS OF PRACTICAL OPTICIANRY 165
Types of Corrective Lenses 166
Single-Vision Lenses 166
Multifocal Lenses 166
Types of Lens Materials 170
Lens Safety Standards 170
Lens Treatments, Tints, and Coatings 171

13 LOW VISION 183
Visual Acuity and Low Vision 184
Common Causes of Low Vision 184
Increasing Awareness 185
Low Vision Care 185
Low Vision Aids 185
Low Vision Devices 186
Nonoptical Aids 187
Other Services 188

14 PRINCIPLES AND PROBLEMS OF CONTACT LENSES 189
Basic Principles 190
Characteristics of Contact Lenses 190
Contact Lenses Versus Eyeglasses for Vision Correction 191
Contact Lens Specification Versus Eyeglass Prescription 191
Types and Materials of Contact Lenses 191
Polymethyl Methacrylate and Rigid Gas-Permeable Contact Lenses 192
Soft Contact Lenses 193
Extended-Wear Contact Lenses 193
Daily-Wear Contact Lenses 193
Disposable Contact Lenses 193
Planned-Replacement Contact Lenses 194
Contact Lens Designs for Special Purposes 194
Cosmetic Fashion Contact Lenses 194
Cosmetic Restorative Contact Lenses 194
Toric Contact Lenses 194
Bifocal Contact Lenses 195
18 REFRACTIVE SURGERY
CONCEPTS AND PROCEDURES 249

History of Refractive Surgery 250
Indications and Contraindications for Refractive Surgical Procedures 250
Evaluating Refractive Surgical Patients 250
  Refraction in Myopia 250
  Refraction in Hyperopia 250
  Refraction in Astigmatism 251
Near Refraction in Patients With Presbyopia 251
  Cycloplegic Refraction 251
Wavefront Analysis 251
  Pupil Size Measurements 251
  Ultrasound Pachymetry and Keratometry 252
Videokeratography 252
Refractive Surgical Procedures 252
  Laser In Situ Keratomileusis 252
  Photorefractive Keratectomy 253
  Laser Subepithelial Keratomileusis 254
  Epithelial Laser In Situ Keratomileusis 255
  Small- Incision Lenticule Extraction 255
  Astigmatic Keratotomy 255
  Conductive Keratoplasty and Laser Thermokeratoplasty 255
  Intrastromal Corneal Ring Segments 255
  Phakic Intraocular Lenses 256
Review 256

19 UNDERSTANDING PRACTICE MANAGEMENT 259

The Ophthalmic Practice and You 260
  For Whom Do You Work? 260
Implementing Patient-Identified Priorities 260
  Seek Patients’ Feedback 260
  “Welcome to the Practice” Brochure or Website 261
The Art of Scheduling 261
Coordinating Patient Flow 261
Patient Educational Materials 262
Provide Team-Based Medical Care 262
Adhere to Compliance Requirements 263
Coding Compliance 263
  Coding Systems 263
  The Benefits of Proper Coding 265
  Documentation 265
  Coding for Ophthalmology Office Visits 265
  Modifiers 265
  Ophthalmic Coding Specialists 266
Focus on the Business Aspect of Ophthalmology 266
Be the Solution, Not the Problem 266
  What to Do 266
  What Not to Do 267
  Attitude and Demeanor 267

20 MEDICAL ETHICS, LEGAL ISSUES, AND REGULATORY ISSUES 269

Ethics in the Time of COVID-19 269
Ethics and Allied Ophthalmic Personnel 270
Ethics and Ophthalmic Medical Assistants 270
  Ethical Behavior 271
  Providing Technical Services 271
  Competence of Technicians 271
  Communication With Patients 272
  Informed Consent and Ophthalmic Assistants 273
Ethics and Pharmaceutical Company Representatives 274
  Professional Conduct 274
  Appearance 275
  Respect and Sensitivity 275
Complementary Topics 275

21 COMMUNITY HEALTH EYE CARE 277

Definitions of Visual Impairment and Blindness 278
Prevalence of Visual Impairment and Blindness 279
Major Causes of Reversible and Irreversible Blindness 280
Social Determinants of Health 280
VISION 2020: The Right to Sight 280
Strategies for Improving Utilization of Eye Care 281
  Local Delivery of Health Education Information 281
  Screening Programs 281
  Surgical Programs 282
Community Health Eye Care Programs and the Team Approach 283
Local Resources Available to Assist Visually Impaired Patients 283
In Summary 283

22 CARE OF OPHTHALMIC LENSES AND INSTRUMENTS 285
Cleaning and Disinfection in the Presence of the Patient 286
Care of Lenses 286
  Standard Guidelines for Care of Lenses 286
Lenses That Do Not Contact the Eye 286
Lenses That Contact the Eye 287
Care of Instruments 288
  Standard Care Guidelines 288
  Keratometer 289
  Lasers 289
  Lensmeter 290
  Direct Ophthalmoscope 290
  Indirect Ophthalmoscope 291
  Phoropter 291
  Perimeters 292
  Potential Acuity Meter 292
  Projector 292
  Retinoscope 294
  Slit Lamp 294
  Applanation Tonometer 294
  Indentation Tonometer 295
  Tono-Pen Tonometer 296
  iCare Tonometer 296
Appendix A: Glossary 297
Appendix B: Resources 321
Index 327
5-1 Performing Retinoscopy Using the Plus Cylinder Convention 58
5-2 Performing Basic Lensometry 62
5-3 Measuring Multifocal Power 63
5-4 Measuring Prism Power and Orientation 64
5-5 Performing Keratometry 65
6-1 Administering Eyedrops and Ointments 73
6-2 Giving First Aid 83
7-1 Following Universal Precautions 93
7-2 Basic Standard Precautions 94
7-3 Washing the Hands Effectively 94
8-1 Performing the Distance Acuity Test 107
8-2 Performing the Pinhole Acuity Test 107
8-3 Performing the Near Acuity Test 108
8-4 Checking Direct and Consensual Pupillary Reaction 111
8-5 Performing the Confrontation Field Test 113
8-6 Performing the Amsler Grid Test 113
8-7 Performing Goldmann Applanation Tonometry 116
8-8 Performing the Flashlight Test to Estimate the Depth of the Anterior Chamber 119
9-1 Conducting a Motility Examination 129
9-2 Performing the Cover–Uncover Test 130
9-3 Performing the Alternate Cover Test 131
9-4 Performing the Prism and Alternate Cover Test 131
9-5 Performing the Worth 4-Dot Test 132
9-6 Performing the Titmus Stereopsis Test 133
11-1 Checklist for Visual Field Testing 162
12-1 Verifying the Prescription and Fit of Progressive Addition Lenses 169
12-2 Measuring Binocular Interpupillary Distance 173
12-3 Measuring Monocular Distance Interpupillary Distance 174
12-4 Measuring Binocular Near Interpupillary Distance 174
12-5 Using a Distometer 176
12-6 Adjusting Frame Screws 179
12-7 Checking Optical Centers 180
13-1 Testing Acuity for Patients With Low Vision 186
14-1 Inserting Soft Lenses 199
14-2 Removing Soft Lenses 200
14-3 Inserting Rigid Lenses 200
14-4 Removing Rigid Lenses 201
15-1 Irrigating the Eye 215
15-2 Assisting a Patient Who Feels Faint 217
16-1 Testing an Infant’s Visual Ability 224
17-1 Applying Pressure Patches and Shields 243
22-1 Cleaning Lenses That Do Not Make Contact With the Eye 287
22-2 Cleaning Lenses That Make Contact With the Eye 287
22-3 Disinfecting Lenses That Make Contact With the Eye 288
22-4 Troubleshooting Instrument Failure 288
VIDEOS AND ACTIVITIES

Videos

5-1 Neutralization of spectacles  57
5-2 Clinical optics  57
5-3 Keratometry  64
6-1 Instilling eyedrops  73
8-1 History taking  105
8-2 Visual acuity  105
8-3 Distance visual acuity testing  105
8-4 Near visual acuity testing  109
8-5 Motility examination  110
8-6 Evaluation of pupils  111
8-7 Confrontation visual fields  112
8-8 Amsler grid testing  112
8-9 Applanation tonometry  115
8-10 Pachymetry  118
8-11 External examination  118
8-12 Slit-lamp assessment of angles  120
8-13 Color vision  122
8-14 Examination with exophthalmometer  123
9-1 Cover testing and alternate cover testing  130
9-2 Ocular motility  132
11-1 Formal visual fields  163
16-1 Patient services  220
16-2 Pediatric examination  226
17-1 Patching  243
17-2 Sterile technique  244
22-1 Instrument maintenance  288

Activities

2-1 The eye as an optical system  8
2-2 The orbit  9
2-3 The external eyelids  10
2-4 Cross-section of the eyelid  11
2-5 The lacrimal apparatus  12
2-6 The 5 layers of the cornea  13
2-7 The uveal tract  15
2-8 The retina at its junction with the optic disc  17
2-9 The visual pathway  18
5-1 Reflexes produced by the streak retinoscope  56
9-1 Anatomy of the extraocular muscles  126
9-2 Brainstem anatomy of the cranial nerves involved in eye movement  127
