

Table of Contents

Introduction	1
Standards, Outcomes, and Learner Objectives	1
Procedures	
Amsler Grid Testing	2
Autorefracton	4
Axial Length Measurement: A-scan Ultrasonography	6
Axial Length Measurement: Partial Coherence Interferometry (IOL Master)	8
Biopsy: Eyelid or Conjunctiva	11
Botulinum: Injection of	13
Brightness Acuity Test (Glare Test)	15
Chalazion Incision and Drainage	17
Chelation with EDTA	19
Color Discrimination Testing	22
Contact Lenses: Removal by Other Than Wearer	26
Contact Lenses/Soft: Insertion, Removal, and Care by Wearer	28
Contact Lenses/Standard Hard and Rigid Gas-Permeable (RGP): Insertion, Removal, and Care by Wearer	31
Corneal Scraping for Specimen	34
Corneal Sensation: Esthesiometry	36
Corneal Topography	38
Disinfection of Ophthalmic Equipment and Environmental Surfaces	40
Endothelial Cell Count	44
Epilation: Electrolysis or Cryodestruction	46
Epilation: Manual with Forceps	48
Exophthalmometry	50
External Examination of the Eye	52
Extraocular Muscle Evaluation and Screening	55
Eye Culture: Conjunctival	57
Eye Drops and Ointments: Instillation of	59
Eye Irrigation for Chemicals	61
Eye Irrigation: Cleansing	63
Eye Patch: Light	65
Eye Patch: Pressure	67
Eye Prosthesis and Conformer: Insertion, Removal, and Care	69
Eye Shield	72
Eyelid Compresses: Cold	73
Eyelid Compresses: Warm	75
Eyelid Eversion	77
Eyelid Hygiene for Blepharitis	79
Eyelid Suture Line Care	81
Facilitating Environmental Control for Persons with Visual Impairment	82
Fluorescein: Injection of	84
History Taking for the Ophthalmic Patient	87
Hypoglycemia: Guidelines for Treatment in the Ophthalmology Clinic and Office	89
Indocyanine Green: Injection of	92
Intravitreal Injections	94
Intravitreal Tap and Injection of Antibiotics	98
Keratotomy: Superficial—Mechanical	100
Keratometry	102
Laser: Patient Preparation and Safety Measures	104

Lensometry: Automated	107
Lensometry: Manual	109
Low-Vision Aids	111
Moisture Chamber	113
Nasolacrimal Patency Testing	115
Needling of a Filtering Bleb	118
Ocular Surface Staining	120
Oculoplastic Procedures	122
OPD—Refractive Power/Corneal Analyzer	125
Optical Coherence Tomography (OCT).....	127
Pachymetry: Ultrasonic	129
Pediatric Ophthalmic Examination	131
Photodynamic Therapy (PDT).....	134
Pneumatic Retinopexy	138
Potential Acuity Measurement: Potential Acuity Meter (PAM) and Laser Interferometer	141
Presurgical Periocular Scrub	143
Pterygium Excision with or without Conjunctival Graft.....	145
Punctal Occlusion Using Hyfrecator or Cautery	148
Punctal Occlusion: Insertion of Punctum Plugs	150
Punctum Plug Removal	152
Pupil Examination	153
Schirmer Tear Test.....	155
Slit Lamp Examination: Basic and Intermediate.....	158
Subconjunctival and Sub-Tenon Injections	164
Tarsorrhaphy	166
Tear Breakup Time (TBUT) Test	168
Tear Osmolarity Test.....	170
Temporal Artery Biopsy.....	172
Tensilon Test	174
Tonometry Using Goldmann Applanation Tonometer	176
Tonometry Using Icare Tonometer	179
Tonometry Using Pneumotonometer	181
Tonometry Using the Tono-Pen.....	184
Trans-Lid Suture (Quickert Sutures).....	187
Triage of the Ophthalmic Patient	189
Ultrasonic Biomicroscopy (UBM).....	191
Ultrasonography: Standardized Echography (Combined B-scan and A-scan).....	193
Visual Acuity: Distance.....	195
Visual Acuity: Near.....	198
Visual Field Evaluation: Automated.....	199
Visual Field Evaluation: Confrontation.....	202
Visual Field Evaluation: Goldmann	204

Appendices

A. Recommendations of American Academy of Ophthalmology Wrong-Site Task Force.....	207
B. Checklist for the Surgery Chart	210
C. Questions for Review	211
