Introduction to the BCSC	xix
Objectives	1
PART I Anatomy	3
1 Orbit and Ocular Adnexa	5
Highlights	5
Orbital Anatomy	5
Dimensions of the Adult Orbit	6
Bony Orbit	6
Orbital Margin	6
Orbital Roof	7
Medial Orbital Wall	8
Orbital Floor	9
Lateral Orbital Wall	10
Orbital Foramina, Canals, and Fissures.	11
Periorbital Sinuses	13
Cranial Nerves	16
Ciliary Ganglion	16
Branches of the Ciliary Ganglion	16
Short Ciliary Nerves.	17
Extraocular Muscles.	17
Extraocular Muscle Origins	18
Extraocular Muscle Insertions	21
Extraocular Muscle Distribution in the Orbit	22
Blood Supply to the Extraocular Muscles	23
Innervation of the Extraocular Muscles	24
Fine Structure of the Extraocular Muscles	24
Vascular Supply and Drainage of the Orbit	24
Posterior and Anterior Ciliary Arteries.	24
Vortex Veins	27
Orbital Veins	28
Eyelids	28
Anatomy.	29
Vascular Supply.	38
Lymphatics.	39
Lacrimal Glands and Excretory System	39
Lacrimal Gland	39
Accessory Glands	41
Lacrimal Excretory System	42

Conjunctiva	44
Caruncle	45
Plica Semilunaris	45
Tenon Capsule	45

2 The Eye	47
Highlights	47
Introduction	47
Topographic Features of the Globe	47
Tear Film	49
Cornea	50
Characteristics of the Central and Peripheral Cornea.	51
Epithelium and Basal Lamina	52
Bowman Layer	52
Stroma.	53
Descemet Membrane	53
Endothelium	54
Corneal Nerves	55
Limbus	56
Sclera	57
Anterior Chamber	60
Trabecular Meshwork	64
Uveal Trabecular Meshwork	65
Corneoscleral Meshwork.	65
Juxtacanalicular Meshwork	65
Schlemm Canal	65
Collector Channels	67
Uvea	69
Iris	70
Stroma.	72
Vessels and Nerves	73
Dilator Muscle and Anterior Pigmented Epithelium	73
Sphincter Muscle	74
Posterior Pigmented Epithelium.	74
Ciliary Body	74
Ciliary Epithelium and Stroma	75
Ciliary Muscle	76
Supraciliary Space.	79
Choroid	79
Choriocapillaris and Choroidal Vessels.	80
Choroidal Stroma	82
Lens	82
Capsule	83
Epithelium	83
Fibers	85
Zonular Fibers	85

Retina	86
Neurosensory Retina	87
Topography of the Retina.	97
Retinal Pigment Epithelium	100
Bruch Membrane	102
Ora Serrata	103
Vitreous	103

3 Cranial Nerves: Central and Peripheral

Connections	107
Highlights	107
Olfactory Nerve (First Cranial Nerve)	110
Optic Nerve (Second Cranial Nerve)	110
Intraocular Region	111
Intraorbital Region	116
Intracanalicular Region	118
Intracranial Region	118
Visual Pathway	118
Blood Supply of the Optic Nerve and Visual Pathway.	123
Oculomotor Nerve (Third Cranial Nerve)	126
Pathways for the Pupil Reflexes	128
Trochlear Nerve (Fourth Cranial Nerve)	131
Trigeminal Nerve (Fifth Cranial Nerve)	132
Mesencephalic Nucleus	132
Main Sensory Nucleus	133
Spinal Nucleus and Tract.	133
Motor Nucleus	134
Intracranial Pathway of Cranial Nerve V	134
Divisions of Cranial Nerve V	135
Abducens Nerve (Sixth Cranial Nerve)	137
Facial Nerve (Seventh Cranial Nerve)	138
Tear Reflex Pathway	141
The Cerebral Vascular System	142
Cavernous Sinus	142
Other Venous Sinuses	142
Circle of Willis	143

PART II Embryology 147

4 Ocular Development	149
Highlights	149
General Principles	149
Eye Development	154
Lens.	160
Posterior Segment.	161
Uvea	166
Cornea, Anterior Chamber, and Sclera	168

Development of the Extraocular Muscles, Adnexa, and Orbit 168
 Extraocular Muscles 168
 Adnexa 170
 Orbit 171
Genetic Cascades and Morphogenic Gradients 171
 Homeobox Gene Program 172
 Growth Factors, Diffusible Ligands, and Morphogens 172
 Future Directions 173

PART III Genetics 175

Introduction 177
Terminology 177

5 Molecular Genetics 179

Highlights 179
Cell Division and the Cell Cycle 179
 Cell Division 179
 The Cell Cycle 179
 Cell Cycle Regulation 180
 Meiosis 181
Genes and Chromosomes 183
 Alleles 183
 Segregation. 184
 Independent Assortment. 184
 Linkage 185
Gene Structure 185
Noncoding DNA 187
Gene Transcription and Translation: The Central Dogma of Genetics 187
 Intron Excision 189
 Alternative Splicing and Isoforms 190
 Methylation 190
 Imprinting 190
 X-Inactivation 191
DNA Damage and Repair 191
 Repair 191
 Apoptosis 192
Pathogenic Variants 192
 Polymorphisms 193
 Pathogenic Variants Versus Polymorphisms. 193
 Genome, Genotype, Phenotype 193
 Single-Gene Disorders 194
 Cancer Genes. 194
 Anticipation 195
 Penetrance 195
 Expressivity 196
 Pleiotropism 196

The Search for Genes in Specific Diseases	197
Polymerase Chain Reaction.	197
Genetic Markers	197
Gene Dosage	198
Linkage and Disease Association	198
Candidate Gene Approaches	199
Pathogenic Variant Screening and Identification	199
Direct Sequencing.	201
Genome-Wide Association Studies	201
Determining Whether Genetic Change Is a Pathogenic Variant	205
Gene Therapy	205
Replacement of an Absent Gene Product in X-Linked and Recessive Diseases	205
Strategies for Dominant Diseases	207

6 Clinical Genetics 211

Highlights	211
Introduction	211
Pedigree Analysis	212
Patterns of Inheritance	214
Dominant Versus Recessive Inheritance	214
Autosomal Recessive Inheritance	215
Autosomal Dominant Inheritance	219
X-Linked Inheritance	221
Maternal Inheritance	225
Terminology: Hereditary, Genetic, Congenital, Familial	225
Chromosome Analysis	227
Aneuploidy of Autosomes	228
Mosaicism	229
Important Chromosomal Aberrations in Ophthalmology.	231
Knudson's 2-Hit Hypothesis and the Genetics of Retinoblastoma and the Neurocutaneous Syndromes	233
Racial and Ethnic Concentration of Genetic Disorders	237
Lyonzation	238
Mitochondrial Disease	240
Chronic Progressive External Ophthalmoplegia	241
MELAS and MIDD	241
Leber Hereditary Optic Neuropathy	242
Neuropathy, Ataxia, and Retinitis Pigmentosa	243
Complex Genetic Disease: Polygenic and Multifactorial Inheritance	243
Pharmacogenetics	244
Clinical Management of Genetic Disease.	245
Accurate Diagnosis	245
Complete Explanation of the Disease	246
Treatment of the Disease Process	246

Genetic Counseling	248
Issues in Genetic Counseling	249
Reproductive Issues	250
Referral to Providers of Support for Persons With Disabilities	251
Recommendations for Genetic Testing of Inherited Eye Disease	252

PART IV Biochemistry and Metabolism 255

Introduction 257

7 Tear Film 259

Highlights	259
Overview of Tear Film.	259
Lipid Layer	262
Mucoaqueous Layer.	262
Aqueous Component	263
Mucin Component	264
Tear Secretion	265
Tear Dysfunction	267

8 Cornea 271

Highlights	271
Biochemistry and Physiology of the Cornea	271
Epithelium.	273
Penetration of the Corneal Epithelium	274
Bowman Layer	275
Stroma	275
Descemet Membrane and Endothelium	277
Descemet Membrane	277
Endothelium	277

9 Aqueous Humor, Iris, and Ciliary Body 281

Highlights	281
Physiology of the Iris and Ciliary Body	281
Dynamics of the Aqueous Humor.	282
Blood–Aqueous Barrier	282
Aqueous Humor Formation and Secretion	282
Clinical Implications of Breakdown of the Blood–Aqueous Barrier	284
Composition of the Aqueous Humor	285
Inorganic Ions	287
Organic Anions.	287
Carbohydrates	288
Glutathione	288
Proteins	288
Growth-Modulatory Factors	289
Oxygen and Carbon Dioxide	291

10	Lens	293
	Highlights	293
	Overview	293
	Structure of the Lens	293
	Capsule	293
	Epithelium	294
	Cortex and Nucleus	295
	Chemical Composition of the Lens	295
	Plasma Membranes	295
	Lens Proteins	296
	Transparency and Physiologic Aspects of the Lens.	298
	Lens Transparency	298
	Lens Physiology.	299
	Lens Metabolism and Formation of Sugar Cataracts	300
	Energy Production	300
	Carbohydrate Cataracts	302
11	Vitreous	303
	Highlights	303
	Overview	303
	Composition.	304
	Collagen	304
	Hyaluronan and Chondroitin Sulfate.	305
	Soluble and Collagen Fiber–Associated Proteins.	307
	Zonular Fibers	307
	Low-Molecular-Weight Solutes	308
	Hyalocytes	308
	Biochemical Changes With Aging and Disease	309
	Vitreous Liquefaction and Posterior Vitreous Detachment	309
	Myopia	310
	Vitreous as an Inhibitor of Angiogenesis	311
	Physiologic Changes After Vitrectomy	311
	Injury With Hemorrhage and Inflammation	311
	Genetic Disease Involving the Vitreous.	313
	Enzymatic Vitreolysis	313
12	Retina	315
	Highlights	315
	Overview	315
	Retinal Oxygen Consumption	316
	Photoreceptors and Phototransduction	316
	Rod Phototransduction	316
	Energy Metabolism of Photoreceptor Outer Segments	321
	Cone Phototransduction	321
	Visual Cycle	322
	Trivariant Color Vision	322
	Photoreceptor Gene Alterations Causing Retinal Degeneration	323

Classes of Retinal Cells	324
Neurons	326
Glial Cells	328
Vascular Cells.	328
Retinal Electrophysiology	329
13 Retinal Pigment Epithelium	331
Highlights	331
Overview of RPE Structure.	331
Biochemical Composition of the RPE	333
Proteins	333
Lipids	334
Nucleic Acids.	334
Major Physiologic Roles of the RPE	334
Vitamin A Regeneration	336
Phagocytosis of Shed Photoreceptor Outer-Segment Discs	338
Transport	338
Pigmentation	341
Retinal Adhesion	341
Secretion.	342
The Role of Autophagy in the RPE	342
The RPE in Disease	343
14 Reactive Oxygen Species and Antioxidants	345
Highlights	345
Overview	345
Reactive Oxygen Species.	346
Sources of Reactive Oxygen Species	346
Lipid Peroxidation	347
Reactive Oxygen Species and Defense Mechanisms	349
Oxidative Damage to the Lens and Protective Mechanisms	350
Vulnerability of the Retina to Reactive Oxygen Species.	351
Antioxidants in the Retina and Retinal Pigment Epithelium	352
Selenium, Glutathione, and Glutathione Peroxidase	352
Vitamin E	352
Superoxide Dismutase and Catalase	353
Ascorbate	353
Carotenoids	354
The Role of Oxidative Stress in Vision-Threatening	
Ophthalmic Diseases	354
Glaucoma	355
Diabetic Retinopathy	357
Age-Related Macular Degeneration	358

PART V	Ocular Pharmacology	361
15	Pharmacologic Principles	363
	Highlights	363
	Introduction to Pharmacologic Principles	364
	Pharmacokinetics	364
	Pharmacodynamics	364
	Pharmacotherapeutics	365
	Toxicity	365
	Pharmacologic Principles and Aging	367
	Pharmacokinetics: The Route of Drug Delivery	368
	Topical Administration: Eyedrops	368
	Topical Administration: Ointments	377
	Local Administration: Injections	377
	Systemic Administration	380
	Ocular Drug Design and Methods of Delivery	382
	Prodrugs	382
	Sustained-Release and Alternative Methods of Drug Delivery	382
	Pharmacogenetics: The Influence of Genetic Variation on Drug Efficacy and Toxicity	386
16	Ocular Pharmacotherapeutics	387
	Highlights	387
	Legal Aspects of Medical Therapy	388
	Compounded Pharmaceuticals	390
	Adherence	391
	Cholinergic Drugs	392
	Muscarinic Drugs	394
	Nicotinic Drugs	401
	Adrenergic Drugs	402
	α -Adrenergic Drugs	402
	β -Adrenergic Drugs	408
	Carbonic Anhydrase Inhibitors	410
	Prostaglandin Analogues	413
	Nitric Oxide Donors	414
	Rho Kinase Inhibitors	415
	Fixed-Combination Medications	417
	Osmotic Drugs	417
	Actions and Uses	417
	Intravenous Drugs	418
	Oral Drugs	418
	Anti-inflammatory Drugs	419
	Glucocorticoids	419
	Nonsteroidal Anti-inflammatory Drugs	430
	Antiallergic Drugs: Mast-Cell Stabilizers and Antihistamines	434
	Antifibrotic Drugs	436

Medications for Dry Eye Syndrome 437

Ocular Decongestants 439

Antimicrobial Drugs 439

 Penicillins and Cephalosporins 439

 Other Antibacterial Drugs 443

 Antifungal Drugs 451

 Antiviral Drugs 454

 Medications for *Acanthamoeba* Infections 459

 Ocular Penetration of Systemically Administered
 Antimicrobial Agents 459

Local Anesthetics 460

 Overview 460

 Specific Drugs 463

 Anesthetics in Intraocular Surgery. 464

Purified Neurotoxin Complex 466

Hyperosmolar Drugs 466

Irrigating Solutions 466

Diagnostic Agents and Surgical Adjuvants 467

Ophthalmic Viscosurgical Devices 468

Fibrinolytic Agents 469

Thrombin 469

Antifibrinolytic Agents 470

Vitamin Supplements and Antioxidants 470

Interferon 470

Growth Factors and Growth Factor Inhibitors 471

 Growth Factors 471

 Growth Factor Inhibitors. 473

Biosimilar Drugs 475

PART VI Imaging and Digital Ophthalmology 477

**17 Principles of Radiology for the Comprehensive
Ophthalmologist 479**

 Highlights 479

 Overview 479

 Computed Tomography 480

 Disadvantages 482

 Magnetic Resonance Imaging 483

 Disadvantages 484

 Ultrasonography 488

 A-Scan Ultrasonography 489

 B-Scan Ultrasonography 490

 Ultrasound Biomicroscopy 494

 Ordering Imaging Studies 495

18	Digital Ophthalmology	505
	Highlights	505
	Introduction	505
	Data	506
	Electronic Health Records	506
	Digital Ophthalmology Standards	506
	Big Data	507
	Teleophthalmology	508
	Artificial Intelligence	508
	Clinical Example	509
	Machine Learning	510
	Design, Bias, and Reference Standards	510
	Large Language Models	512
	Conclusions	512
	Additional Materials and Resources	513
	Requesting Continuing Medical Education Credit	515
	Study Questions	517
	Answers	525
	Index	533
