

Contents

Introduction to the BCSC	xv
Objectives	1
Introduction The Lens and Cataract: A Brief Historical Perspective	3
Highlights	3
A Brief History of Cataract Surgery	5
Posterior Chamber IOLs and Other Lens Modifications	8
1 Epidemiology of Cataract	11
Highlights	11
Introduction	11
Cataract Prevalence and Distribution of Subtypes	12
Risk Factors for the Development of Cataract.	14
Cataract Surgery Rate and Outcomes	15
2 Anatomy	19
Highlights	19
Normal Crystalline Lens.	19
Capsule	20
Zonular Fibers	21
Lens Epithelium.	22
Nucleus and Cortex	23
3 Biochemistry and Physiology	25
Highlights	25
Molecular Biology	25
Crystallin Proteins	25
Membrane Structural Proteins and Cytoskeletal Proteins	26
Increase of Water-Insoluble Proteins With Age	27
Carbohydrate Metabolism	28
Glycolysis and Hexose Monophosphate Shunt.	28
Sorbitol Pathway	29
Oxidative Damage and Protective Mechanisms	31
Lens Physiology	33
Maintenance of Lens Water and Cation Balance	33
Accommodation and Presbyopia	34

4	Embryology and Developmental Anomalies	37
	Highlights	37
	Normal Development of the Lens	37
	Lens Placode	37
	Lens Pit	38
	Lens Vesicle	39
	Primary Lens Fibers and the Embryonic Nucleus	40
	Secondary Lens Fibers	40
	Lens Sutures and the Fetal Nucleus	40
	Tunica Vasculosa Lentis	41
	The Zonule of Zinn	41
	Congenital Anomalies and Abnormalities	42
	Congenital Aphakia	42
	Lenticonus and Lentiglobus	42
	Lens Coloboma	43
	Mittendorf Dot	44
	Epicapsular Star	45
	Peters Anomaly	45
	Microspherophakia	46
	Aniridia	47
	Persistent Fetal Vasculature	47
	Congenital Cataract	48
	Developmental Anomalies	54
	Ectopia Lentis	54
	Genetic Contributions to Age-Related Cataracts	56
	Ectopia Lentis et Pupillae	57
5	Pathology	59
	Highlights	59
	Age-Related Lens Changes	59
	Nuclear Cataracts	59
	Cortical Cataracts	61
	Posterior Subcapsular Cataracts	64
	Drug-Induced Lens Changes	67
	Corticosteroids	67
	Phenothiazines	67
	Miotics	68
	Amiodarone	68
	Statins	68
	Tamoxifen	68
	Procedure-Induced Lens Changes	69
	Intraocular Procedures	69
	Radiation	69
	Hyperbaric Oxygen	71
	Trauma-Related Lens Changes	71
	Contusion	71
	Perforating or Penetrating Injury	72

Intralenticular Foreign Bodies	73
Metallosis	74
Electrical Injury	75
Chemical Injuries	75
Lens Changes Associated with Systemic Disease	75
Metabolic Disease	75
Myotonic Dystrophy	78
Atopic Dermatitis	79
Ischemia	79
Effects of Nutrition, Alcohol, and Smoking	80
Cataract Associated With Ocular Disorders	80
Uveitis	80
Glaukomflecken	81
Pseudoexfoliation Syndrome	82
Cataracts Associated With Degenerative Ocular Disorders	83
Phacoantigenic Uveitis	83
Lens-Induced Glaucoma	83
Phacolytic Glaucoma	83
Lens Particle Glaucoma	84
Phacomorphic Glaucoma	84
6 Evaluation and Management of Cataract	85
Highlights	85
Introduction	85
Clinical History: Symptoms and Correlating Signs	86
Decreased Visual Acuity	86
Glare and Altered Contrast Sensitivity	86
Refractive Changes	87
Monocular Diplopia or Polyopia	87
Decreased Visual Function	87
Nonsurgical Management	87
Indications for Surgery	88
Medical Indications	88
Functional Indications	89
Treatment of Unilateral Cataract	89
Treatment of Bilateral Cataract	89
Immediate Sequential Bilateral Cataract Surgery	89
Preoperative Evaluation	90
General Health of the Patient	90
Pertinent Ocular History	91
Social History	92
Measurements of Visual Function	92
Visual Acuity Testing	92
Refraction	93
Glare Testing	93
Contrast Sensitivity Testing	93

External Examination	94
Motility and Ocular Dominance	94
Pupils	94
Slit-Lamp Examination	95
Conjunctiva	95
Cornea	95
Anterior Chamber and Iris	95
Crystalline Lens	96
Cataract Grading and Classification	96
Limitations of Slit-Lamp Examination	97
Fundus Evaluation	97
Ophthalmoscopy	97
Optic Nerve	98
Fundus Evaluation With Opaque Media	98
Special Tests	98
Potential Acuity Estimation	98
Visual Field Testing	99
Corneal Evaluation	99
Objective Tests of Macular Function	100

7 Preoperative Considerations for Cataract

Surgery and Improving Refractive Outcomes	101
Highlights	101
Intraocular Lens Technology	101
Intraocular Lens Characteristics	102
IOL Classifications	104
Monofocal IOLs	104
Multifocal IOLs	104
Extended Depth of Focus IOLs	106
Accommodating IOLs	108
Other Presbyopia-Correcting IOLs	108
IOLs Capable of Postoperative Adjustment	108
Modification of Preexisting Astigmatism	108
Corneal Relaxing Incisions	110
Toric IOLs	112
Preoperative Measurements	114
Axial Length	114
Corneal Power	116
Anterior Chamber Depth and Effective Lens Position	117
IOL Power Determination	117
Classic Regression Formula	117
IOL Calculation	117
Calculations Following Refractive Surgery	118
Expected Placement of IOL	120
Tracking Refractive Outcomes	120
Anesthesia for Cataract Surgery	121
Antimicrobial Therapy	123
Before Surgery	123

During Surgery	124
After Surgery	125
Ophthalmic Viscosurgical Devices	126
Physical Properties of OVDs	126
Uses of OVDs	128
Patient Preparation and Informed Consent	128
Preventing Errors in Cataract Surgery Planning	129

8 Phacoemulsification for Cataract Extraction 131

Highlights	131
Introduction	131
Instrumentation	132
Key Concepts and Advances in Phaco Power Delivery	133
Phaco Tip	133
Pulse and Burst Modes	134
Torsional and Elliptical Phacoemulsification	134
Irrigation	134
Aspiration Pumps.	136
Peristaltic (or Flow) Pumps	136
Venturi (or Vacuum) Pumps	137
Outline of the Phacoemulsification Procedure	138
Eye Marking and Time-Out	138
Exposure of the Globe	138
Paracentesis	138
Clear Corneal Incision	139
Scleral Tunnel Incision.	140
Continuous Curvilinear Capsulorrhexis	141
Hydrodissection	143
Hydrodelineation	143
Nucleus Rotation	144
Nucleus Disassembly and Removal	144
Location of Emulsification	145
Techniques of Nucleus Disassembly	146
Irrigation and Aspiration.	148
Insertion of the Intraocular Lens	149
After IOL Insertion	153
Alternative Technologies for Cataract Extraction	154
Femtosecond Laser–Assisted Cataract Surgery	154
Outcomes of Cataract Surgery	155
Sustainable Cataract Surgery	156
Glossary of Fluidics and Phacodynamics Terminology	156
Glossary of Ultrasonic Technology Terminology	158

9 Nonphacoemulsification Cataract Surgery 159

Techniques	159
Highlights	159
Intracapsular Cataract Extraction	159
Standard Extracapsular Cataract Extraction	160
Manual Small-Incision Cataract Surgery	163

10	Intraoperative Challenges in Cataract Surgery	165
	Highlights	165
	Introduction	165
	Corneal and Conjunctival Complications	166
	Self-Limited Intraoperative Complications	166
	Incision and Wound Complications	166
	Descemet Membrane Detachment	169
	Anterior Segment Complications	170
	Intraoperative Floppy Iris Syndrome	170
	Femtosecond Laser–Associated Miosis	171
	Lens–Iris Diaphragm Retropulsion Syndrome	172
	Iridodialysis and Iris Trauma	172
	Cyclodialysis	174
	Intraoperative Shallow or Flat Anterior Chamber	174
	Anterior Capsule Tears	175
	Posterior Capsular Rupture	177
	IOL Placement with Posterior Capsule Rupture	180
	Hemorrhage	181
	Retrobulbar Hemorrhage	181
	Intraoperative Hemorrhage	182
	Suprachoroidal Effusion or Hemorrhage	182
	Expulsive Suprachoroidal Hemorrhage	183
11	Postoperative Surgical Course and Complications	185
	Highlights	185
	Introduction	185
	Corneal Complications	186
	Corneal Edema	186
	Corneal Melt	188
	Induced Astigmatism	189
	Other Anterior Segment Complications	190
	Epithelial or Fibrous Ingrowth	190
	Shallow or Flat Anterior Chamber	191
	Elevated IOP	191
	Hyphema	193
	Retained Lens Fragments	194
	Vitreous Prolapse in the Anterior Chamber	195
	Postoperative IOL Complications	195
	Decentration and Dislocation	195
	Pupillary Capture	201
	Capsular Block Syndrome	202
	Uveitis–Glaucoma–Hyphema Syndrome	202
	Pseudophakic Bullous Keratopathy	203
	IOL Opacification	204
	IOL Glare and Dysphotopsia	205
	Unexpected Refractive Results	206

Capsular Opacification and Contraction	207
Posterior Capsule Opacification	207
Anterior Capsule Fibrosis and Phimosis	209
Nd:YAG Laser Capsulotomy	210
Diplopia	213
Inflammatory and Infectious Complications	214
Postoperative Uveitis	214
Toxic Anterior Segment Syndrome	215
Endophthalmitis	217
Retinal Complications	221
Cystoid Macular Edema	221
Hemorrhagic Occlusive Retinal Vasculitis	223
Retinal Light Toxicity	223
Delayed Suprachoroidal Hemorrhage	224
Retinal Detachment	224

12 Preparing for Cataract Surgery in

Special Situations	227
Highlights	227
Psychosocial Considerations	227
Claustrophobia	227
Neurocognitive and Neurodevelopmental Disorders	228
Patient Communication During Eye Surgery	228
Systemic Considerations	229
Medical Status	229
Anticoagulation Therapy or Bleeding Disorders	230
External Ocular Abnormalities	231
Blepharitis and Acne Rosacea	231
Atopic Dermatitis	231
Keratoconjunctivitis Sicca	231
Mucous Membrane Pemphigoid	232
Exposure Keratitis and Cranial Nerve VII Palsy	232
Corneal Pathologies	232
Corneal Disease	232
Cataract and Keratoplasty	234
Cataract Following Keratoplasty	235
Cataract Following Refractive Surgery	236
Compromised Visualization of the Lens	237
Small Pupil	237
Poor Red Reflex	238
Altered Lens and Zonular Anatomy	239
Intumescent Cataract	239
Advanced Cataract	239
Iris Coloboma and Corectopia	240
Posterior Polar Cataract	240
Zonular Dehiscence With Lens Subluxation or Dislocation	241
Pseudoexfoliation Syndrome	243
Cataract in Aniridia	244

Conditions Associated With Extremes in Axial Length	244
High Myopia	244
High Hyperopia and Nanophthalmos	245
Hypotony	245
Glaucoma	246
Assessment	246
Cataract Surgery in an Eye With a Functioning Filter	247
Combining MIGS With Cataract Surgery	247
Uveitis	248
Retinal Conditions	249
Retinal Disease	249
Cataract Following Pars Plana Vitrectomy	250
Cataract With Intraocular Silicone Oil	251
Optic Nerve	251
Nonarteritic Ischemic Optic Neuropathy	251
Ocular Trauma	251
Ocular Assessment	251
Visualization During Surgery	252
Inflammation	252
Retained Foreign Matter	252
Cataract in an Eye With Damage to Other Ocular Tissues	252
Removal of Traumatic Cataract	253
Vision Rehabilitation	254
IOL Selection After Trauma	254
Additional Materials and Resources	255
Requesting Continuing Medical Education Credit	257
Study Questions	259
Answers	267
Index	273
