General Introduction	xvii
Objectives	1
PART I Anatomy	3
1 Orbit and Ocular Adnexa	5
Highlights	5
Orbital Anatomy	5
Dimensions of the Adult Orbit	5
Bony Orbit	6
Orbital Margin	7
Orbital Roof	8
Medial Orbital Wall	8
Orbital Floor	8
Lateral Orbital Wall	10
Orbital Foramina, Ducts, Canals, and Fissures	10
Periorbital Sinuses	12
Cranial Nerves	15
Ciliary Ganglion	15
Branches of the Ciliary Ganglion	15
Short Ciliary Nerves	16
Extraocular Muscles	17
Extraocular Muscle Origins	18
Extraocular Muscle Insertions	20
Extraocular Muscle Distribution in the Orbit	20
Blood Supply to the Extraocular Muscles	21
Innervation of the Extraocular Muscles	21
Fine Structure of the Extraocular Muscles	22
Vascular Supply and Drainage of the Orbit	22
Posterior and Anterior Ciliary Arteries	22
Vortex Veins	22
Eyelids	26
Anatomy	26
Vascular Supply of the Eyelids	37
Lymphatics of the Eyelids	38
Lacrimal Glands and Excretory System	39
Lacrimal Gland	39
Accessory Glands	41
Lacrimal Excretory System	42

Conjunctiva	43
Caruncle	44
Plica Semilunaris	44
Tenon Capsule	44
2 The Eye	47
Highlights	47
Introduction	47
Topographic Features of the Globe	48
Precorneal Tear Film	49
Cornea	50
Characteristics of the Central and Peripheral Cornea.	51
Epithelium and Basal Lamina	51
Bowman Layer	51
Stroma	53
Descemet Membrane	53
Endothelium	54
Limbus	55
Sclera	56
Anterior Chamber	59
Trabecular Meshwork	63
Uveal Trabecular Meshwork	63
Corneoscleral Meshwork.	63
Juxtacanalicular Meshwork	64
Schlemm Canal	64
Collector Channels	64
Uvea	64
Iris	68
Stroma	68
Vessels and Nerves	69
Dilator Muscle and Anterior Pigmented Epithelium	70
Sphincter Muscle	71
Posterior Pigmented Epithelium.	71
Ciliary Body	72
Ciliary Epithelium and Stroma	72
Ciliary Muscle	75
Supraciliary Space.	76
Choroid	76
Choriocapillaris and Choroidal Vessels.	76
Choroidal Stroma	77
Lens	79
Capsule	79
Epithelium	80
Fibers	82
Zonular Fibers	82
Retina.	83
Neurosensory Retina	84
Topography of the Retina	93

Retinal Pigment Epithelium 97
 Bruch Membrane 99
 Ora Serrata 99
 Vitreous 101

3 Cranial Nerves: Central and Peripheral

Connections 105
 Highlights 105
 Olfactory Nerve (First Cranial Nerve) 105
 Optic Nerve (Second Cranial Nerve) 109
 Intraocular Region 110
 Intraorbital Region 113
 Intracanalicular Region 115
 Intracranial Region 115
 Visual Pathway 115
 Blood Supply of the Optic Nerve and Visual Pathway. 119
 Oculomotor Nerve (Third Cranial Nerve) 123
 Pathways for the Pupil Reflexes 126
 Trochlear Nerve (Fourth Cranial Nerve) 127
 Trigeminal Nerve (Fifth Cranial Nerve) 128
 Mesencephalic Nucleus 129
 Main Sensory Nucleus 129
 Spinal Nucleus and Tract 130
 Motor Nucleus 131
 Intracranial Pathway of Cranial Nerve V 131
 Divisions of Cranial Nerve V 131
 Abducens Nerve (Sixth Cranial Nerve) 133
 Facial Nerve (Seventh Cranial Nerve) 133
 Tear Reflex Pathway 135
 The Cerebral Vascular System 135
 Cavernous Sinus 135
 Other Venous Sinuses 136
 Circle of Willis 138

PART II Embryology 141

4 Ocular Development 143
 Highlights 143
 General Principles 143
 Eye Development 148
 Lens 153
 Posterior Segment. 155
 Uvea 157
 Cornea, Anterior Chamber, and Sclera 161
 Development of the Extraocular Muscles, Adnexa, and Orbit 162
 Extraocular Muscles 162
 Adnexa 163
 Orbit 164

Genetic Cascades and Morphogenic Gradients 164
 Homeobox Gene Program 164
 Growth Factors, Diffusible Ligands, and Morphogens 165
 Future Directions 166

PART III Genetics 169

Introduction 171
 Terminology 171

5 Molecular Genetics 173

Highlights 173
 The Cell Cycle 173
 Meiosis 174
 Cell Cycle Regulation 175
 Gene Structure 176
 Noncoding DNA 177
 Gene Transcription and Translation: The Central Dogma of Genetics . . . 178
 Intron Excision 179
 Alternative Splicing and Isoforms 179
 Methylation 180
 X-Inactivation 180
 Imprinting 180
 DNA Damage and Repair 181
 Repair 181
 Apoptosis 182
 Mutations and Disease 182
 Mutations Versus Polymorphisms 182
 Cancer Genes. 183
 Mitochondrial Disease 184
 Chronic Progressive External Ophthalmoplegia 185
 MELAS and MIDD 185
 Leber Hereditary Optic Neuropathy 185
 Neuropathy, Ataxia, and Retinitis Pigmentosa. 186
 The Search for Genes in Specific Diseases 186
 Polymerase Chain Reaction. 186
 Genetic Markers 187
 Gene Dosage 187
 Linkage and Disease Association 187
 Candidate Gene Approaches 188
 Mutation Screening 189
 Direct Sequencing. 189
 Genome-Wide Association Studies 189
 Determining Whether Genetic Change Is a Pathogenic Mutation . . . 194
 Gene Therapy 194
 Replacement of Absent Gene Product in X-Linked and Recessive
 Diseases 194
 Strategies for Dominant Diseases 197

6 Clinical Genetics	199
Highlights	199
Introduction	199
Pedigree Analysis	200
Patterns of Inheritance	202
Dominant Versus Recessive Inheritance	202
Autosomal Recessive Inheritance	203
Autosomal Dominant Inheritance	206
X-Linked Inheritance	208
Maternal Inheritance	210
Terminology: Hereditary, Genetic, Familial, Congenital	210
Genes and Chromosomes	213
Alleles	214
Mitosis	215
Meiosis	215
Segregation	215
Independent Assortment	216
Linkage	217
Mutations	217
Polymorphisms	218
Genome, Genotype, Phenotype	218
Single-Gene Disorders	218
Anticipation	218
Penetrance	219
Expressivity	220
Pleiotropism	220
Chromosome Analysis	221
Indications for and Types of Chromosome Analysis	221
Aneuploidy of Autosomes	222
Mosaicism	224
Important Chromosomal Aberrations in Ophthalmology	225
Knudson's 2-Hit Hypothesis and the Genetics of Retinoblastoma and the Phakomatoses	227
Racial and Ethnic Concentration of Genetic Disorders	229
Lyonization	230
Complex Genetic Disease: Polygenic and Multifactorial Inheritance	232
Pharmacogenetics	233
Clinical Management of Genetic Disease	234
Accurate Diagnosis	234
Complete Explanation of the Disease	234
Treatment of the Disease Process	235
Genetic Counseling	236
Issues in Genetic Counseling	237
Reproductive Issues	238
Referral to Providers of Support for Persons With Disabilities	240
Recommendations for Genetic Testing of Inherited Eye Disease	240

PART IV	Biochemistry and Metabolism	243
	Introduction	245
7	Tear Film	247
	Highlights	247
	Overview	247
	Lipid Layer	249
	Mucoaqueous Layer	251
	Aqueous Component	251
	Mucin Component	253
	Tear Secretion	253
	Tear Dysfunction	256
8	Cornea	259
	Highlights	259
	Biochemistry and Physiology of the Cornea	259
	Epithelium	260
	Penetration of the Corneal Epithelium	262
	Bowman Layer	262
	Stroma	263
	Descemet Membrane and Endothelium	266
	Descemet Membrane	266
	Endothelium	266
9	Aqueous Humor, Iris, and Ciliary Body	269
	Highlights	269
	Physiology of the Iris and Ciliary Body	269
	Dynamics of the Aqueous Humor	270
	Blood–Aqueous Barrier	270
	Aqueous Humor Formation and Secretion	270
	Composition of the Aqueous Humor	273
	Inorganic Ions	274
	Organic Anions	274
	Carbohydrates	274
	Glutathione and Urea	275
	Proteins	275
	Growth-Modulatory Factors	277
	Oxygen and Carbon Dioxide	278
	Clinical Implications of Breakdown of the Blood–Aqueous Barrier	279
10	Lens	281
	Highlights	281
	Overview	281
	Structure of the Lens	281
	Capsule	281
	Epithelium	282
	Cortex and Nucleus	283

Chemical Composition of the Lens	284
Plasma Membranes	284
Lens Proteins	284
Transparency and Physiologic Aspects of the Lens	286
Lens Transparency	286
Lens Physiology.	286
Lens Metabolism and Formation of Sugar Cataracts	289
Energy Production	289
Carbohydrate Cataracts	289
11 Vitreous	293
Highlights	293
Overview	293
Composition.	294
Collagen	294
Hyaluronan and Chondroitin Sulfate	297
Soluble and Collagen Fiber–Associated Proteins	298
Zonular Fibers	298
Low-Molecular-Weight Solutes	298
Hyalocytes	299
Biochemical Changes With Aging and Disease	300
Vitreous Liquefaction and Posterior Vitreous Detachment	300
Myopia	301
Vitreous as an Inhibitor of Angiogenesis	301
Physiologic Changes After Vitrectomy	302
Injury With Hemorrhage and Inflammation	302
Genetic Disease Involving the Vitreous.	302
Enzymatic Vitreolysis	304
12 Retina	305
Highlights	305
Overview	305
Photoreceptors and Phototransduction	306
Rod Phototransduction	306
Energy Metabolism of Photoreceptor Outer Segments	311
Cone Phototransduction	311
Photoreceptor Gene Defects Causing Retinal Degeneration	312
Classes of Retinal Cells	315
Neurons	315
Glial Cells	317
Vascular Cells	317
Retinal Electrophysiology	318
13 Retinal Pigment Epithelium	321
Highlights	321
Overview of RPE Structure	321
Biochemical Composition	323

Proteins	323
Lipids	324
Nucleic Acids	324
Major Physiologic Roles of the RPE	324
Vitamin A Regeneration	326
Phagocytosis of Shed Photoreceptor Outer-Segment Discs	328
Transport	328
Pigmentation	331
Retinal Adhesion	331
Secretion	332
The Role of Autophagy in the RPE	332
The RPE in Disease	332

14 Reactive Oxygen Species and Antioxidants 335

Highlights	335
Overview	335
Reactive Oxygen Species	336
Sources of Reactive Oxygen Species	336
Lipid Peroxidation	337
Reactive Oxygen Species and Defense Mechanisms	338
Oxidative Damage to the Lens and Protective Mechanisms	339
Vulnerability of the Retina to Reactive Oxygen Species	340
Antioxidants in the Retina and Retinal Pigment Epithelium	341
Selenium, Glutathione, and Glutathione Peroxidase	341
Vitamin E	342
Superoxide Dismutase and Catalase	342
Ascorbate	342
Carotenoids	343
The Role of Oxidative Stress in Vision-Threatening	
Ophthalmic Diseases	343
Glaucoma	345
Diabetic Retinopathy	345
Age-Related Macular Degeneration	346

PART V Ocular Pharmacology 347

15 Pharmacologic Principles 349

Highlights	349
Introduction to Pharmacologic Principles	350
Pharmacokinetics	350
Pharmacodynamics	350
Pharmacotherapeutics	350
Toxicity	350
Pharmacologic Principles and Elderly Patients	351
Pharmacokinetics: The Route of Drug Delivery	352
Topical Administration: Eyedrops	352
Topical Administration: Ointments	358

Local Administration	359
Systemic Administration	361
Ocular Drug Design and Methods of Delivery	363
Prodrugs.	363
Sustained-Release Delivery	363
Collagen Corneal Shields.	365
New Technologies in Drug Delivery	365
Pharmacodynamics: The Mechanism of Drug Action	367
Pharmacogenetics: The Influence of Genetic Variation on Drug Efficacy and Toxicity	368

16 Ocular Pharmacotherapeutics	369
Highlights	369
Legal Aspects of Medical Therapy.	370
Compounded Pharmaceuticals	372
Compliance	373
Cholinergic Drugs	374
Muscarinic Drugs	375
Nicotinic Drugs.	381
Adrenergic Drugs.	382
α -Adrenergic Drugs	384
β -Adrenergic Drugs	387
Carbonic Anhydrase Inhibitors	391
Prostaglandin Analogues	393
Nitric Oxide Donors	394
Rho Kinase Inhibitors	395
Fixed-Combination Medications	397
Osmotic Drugs	397
Actions and Uses	397
Intravenous Drugs	398
Oral Drugs	398
Anti-inflammatory Drugs	399
Glucocorticoids.	399
Nonsteroidal Anti-inflammatory Drugs	407
Antiallergic Drugs: Mast-Cell Stabilizers and Antihistamines	411
Antifibrotic Drugs.	413
Medications for Dry Eye.	415
Ocular Decongestants	416
Antimicrobial Drugs	417
Penicillins and Cephalosporins	417
Other Antibacterial Drugs	420
Antifungal Drugs	429
Antiviral Drugs	431
Medications for <i>Acanthamoeba</i> Infections	437
Local Anesthetics	437
Overview	437
Specific Drugs	440
Anesthetics in Intraocular Surgery.	441

Purified Neurotoxin Complex 443
Hyperosmolar Drugs 443
Irrigating Solutions 443
Diagnostic Agents 444
Ophthalmic Viscosurgical Devices 445
Fibrinolytic Agents 445
Thrombin 446
Antifibrinolytic Agents 446
Vitamin Supplements and Antioxidants 447
Interferon 447
Growth Factors 448

PART VI Imaging 451

17 Principles of Radiology for the Comprehensive Ophthalmologist 453
Highlights 453
Overview 453
Computed Tomography 454
 Disadvantages 456
Magnetic Resonance Imaging 457
 Disadvantages 458
Ultrasonography 462
 A-Scan 463
 B-Scan 464
 Ultrasound Biomicroscopy 468
Ordering Imaging Studies 472

Appendix: Genetics Glossary 477
Basic Texts 493
Related Academy Materials 495
Requesting Continuing Medical Education Credit 497
Study Questions 499
Answer Sheet for Section 2 Study Questions 507
Answers 509
Index 517
